

# PEDDIBLAST

SHOT BLASTING SYSTEM  
POWERED BY AGTOS

B I G G E R • F A S T E R • S T R O N G E R

## HIGH PERFORMANCE TURBINES

- High performance blasting turbines designed using manganese housing
- Single disc design maintains less wear parts than more complex, and less efficient double disc turbines
- Wide range of versions for optimum results

## VERTICAL BEARING

- Roller bearings are mounted on the outside of the machine to prevent issues caused by exposure to blasting abrasives
- Special labyrinth seals add extra wear protection
- Optical checks of the bearings prevent from unplanned machine stops

## MACHINE CONCEPT - EASY TO MAINTAIN

- Exchange of filter cartridges is easy, quick and clean
- Extra wide access points to operating chambers
- Includes easily exchanged manganese steel plates in the direct blasting path of the turbines
- Easily exchange wear resistant rubber curtains for containing particulate within the operating area of the machine

## FURTHER SPECIAL ADVANTAGES

- Improved air separator for removing undersized particles and for cleaning of abrasive
- Durable machine housing made from extra hard manganese steel
- A large maintenance platform for hassle free access to the wind separator and bucket elevator portions of the machine

**Peddinghaus**

 **AGTOS®**

## HIGH PERFORMANCE TURBINES

Robust single disc turbines

## MACHINE CONCEPT - EASY TO MAINTAIN

Large access doors for simplified maintenance

## FURTHER SPECIAL ADVANTAGES

Separation of particles from blasting abrasives

## VERTICAL BEARING

Special labyrinth seals add extra wear protection
